

Subaranjani Rajkumar

📍 Trichy, Tamil Nadu | 📞 +91 9944542136 | ✉ subaranjani0304@gmail.com | 🔗 <https://www.linkedin.com/in/subaranjani-rajkumar-418b01289>

Profession Summary

Aspiring to secure a challenging role in a dynamic organization where I can leverage my technical skills, problem-solving ability, and passion for continuous learning. Known for strong analytical thinking, adaptability, and a detail-oriented approach to software development.

Education

MSc Computer Science , Bishop Heber College	2025
• CGPA: 8.02/10.0	
BSc Computer Science , Bishop Heber College	2023
• CGPA: 8.50/10.0	
HSC (II Year) , Cauvery Matric Hr. Sec. School	2020
• Percentage: 65	
SSLC , Cauvery Matric Hr. Sec. School	2018
• Percentage: 82	

Internship

Full Stack Developer Intern , Suyap Tech Solutions – Trichy (Jun,2024- Aug 2024)
- Developed a Hospital Management System using React.js (frontend) and PHP (backend). Key responsibilities included designing user-friendly interfaces for modules such as Patient, Appointment, Billing, and Insurance. - Integrated APIs to optimize data flow, resulting in a fully functional web-based system that enhanced operational efficiency and data accuracy.

Paper Presentation

Predictive Model for Shock Development in Dengue Patients Using Machine Learning Techniques
- Presented at the International Conference on Next-Gen AI: Transforming Scientific and Mathematical Research (ICAI-2025) at SRM Institute of Science and Technology, Trichy. - Developed a Random Forest-based model for early detection of Dengue Shock Syndrome, improving prediction accuracy for timely medical intervention.

Projects

Predictive Model for Shock Development in Dengue Patients Using Machine Learning Techniques	2025
Developed a machine learning model using the Random Forest algorithm to predict Dengue Shock Syndrome (DSS) risk based on patient health and environmental factors. The model enhances early detection, outperforming Bagging Decision Trees in accuracy and reliability.	
Cardiovascular Disease Prediction Based on Deep Learning Technique	2023
Developed a Cardiovascular Disease Prediction System using a Multi-Layer Perceptron (MLP) model for heart disease classification. Implemented Artificial Neural Networks (ANNs) to enhance accuracy and minimize prediction errors.	

Technical Skills

- **Programming Languages:** HTML/CSS, Python, PHP
- **Frontend Development:** React.js
- **Backend Frameworks:** Laravel
- **Database:** MySQL
- **Cloud:** Microsoft Azure
- **Tools & Platforms:** Visual Studio Code, Postman, Figma

Certifications

- **Learn MySQL- For Beginners**, Udemy
- **Cloud Computing: Understanding Core Concepts**, LinkedIn Learning
- **Artificial Intelligence Foundations: Machine Learning**, LinkedIn Learning
- **Workshop on Setting up your Development Environment Using Flask**, Bishop Heber College
- **UI/UX Design Workshop**, Vebzon Technologies, Trichy
- **Industrial Visit** at CodeBind Technologies, Trichy
- **Python Complete Course for Beginners**- Udemy
